

HAIDIAN MINDS CONVERGE • JING-ZHANG STARS AGLOW

Urban design framework: three corridors and cores • two wings • one loop • six civic protocol gates

A3-01

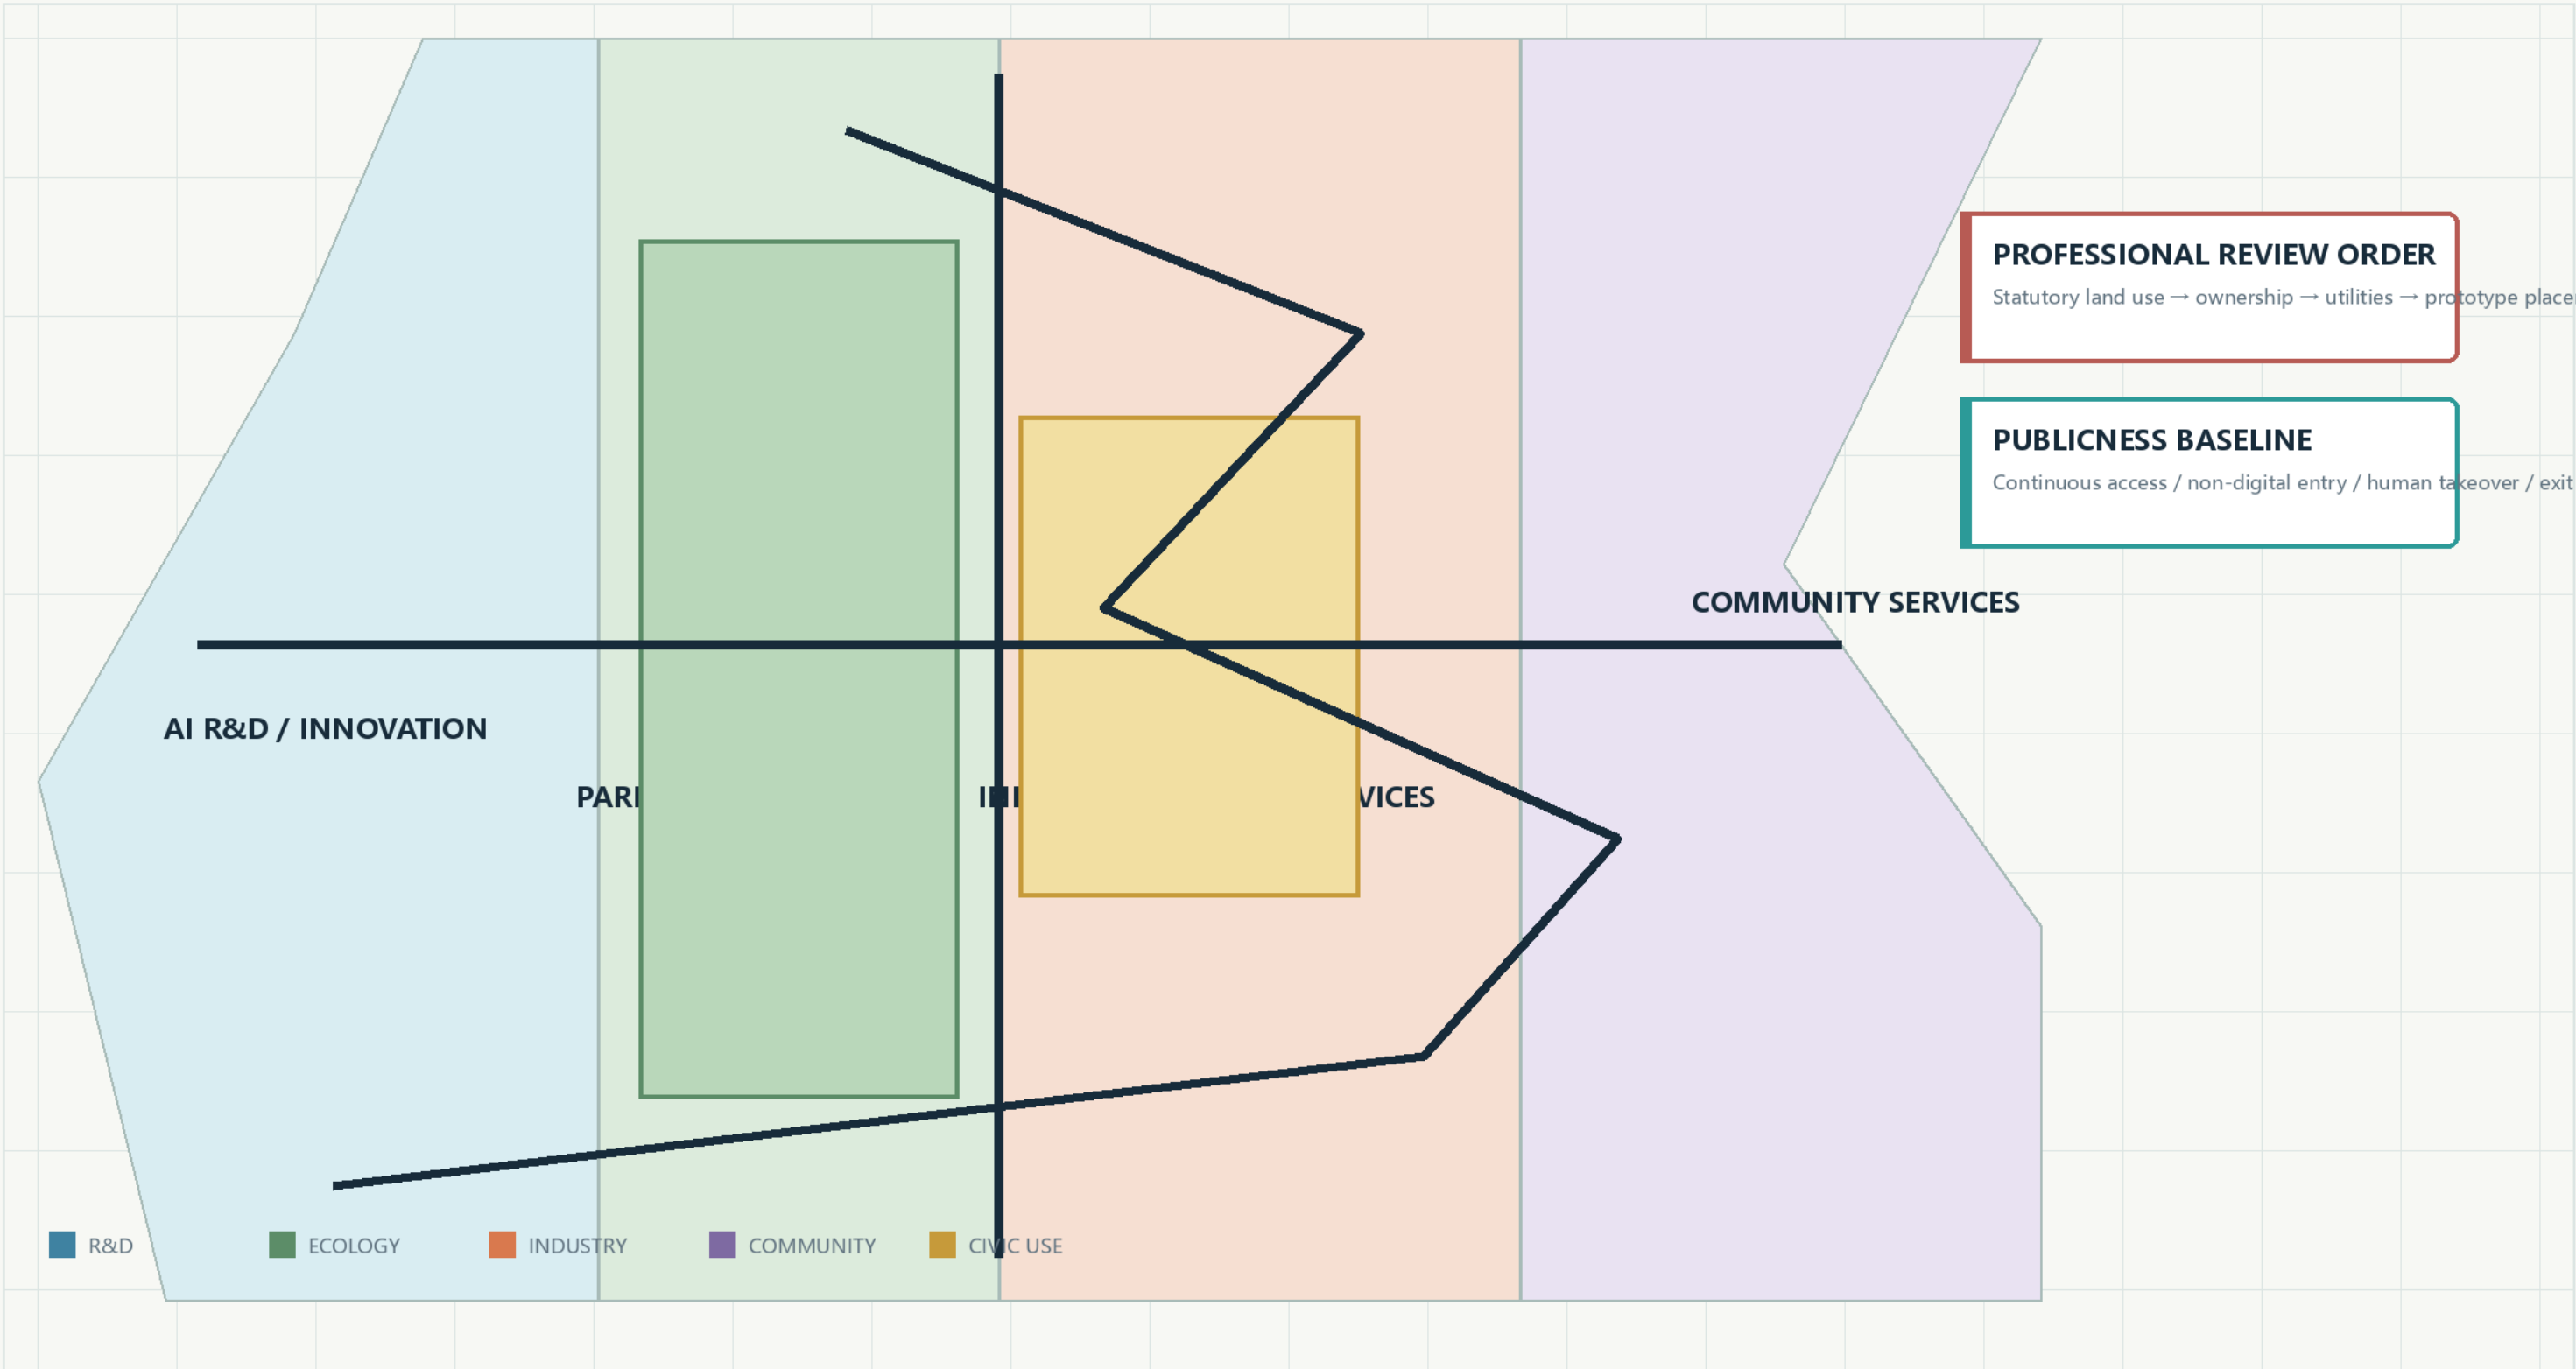

Conceptual spatial relationships only. Key areas and boundaries are provisional; relocate and recalculate when verified GIS/CAD arrives.

CONCEPT / PROVISIONAL GEOMETRY

LAND USE & ECOLOGICAL FRAMEWORK

Four conceptual land-use families + continuous parkland + civic interfaces as the spatial base for the protocol

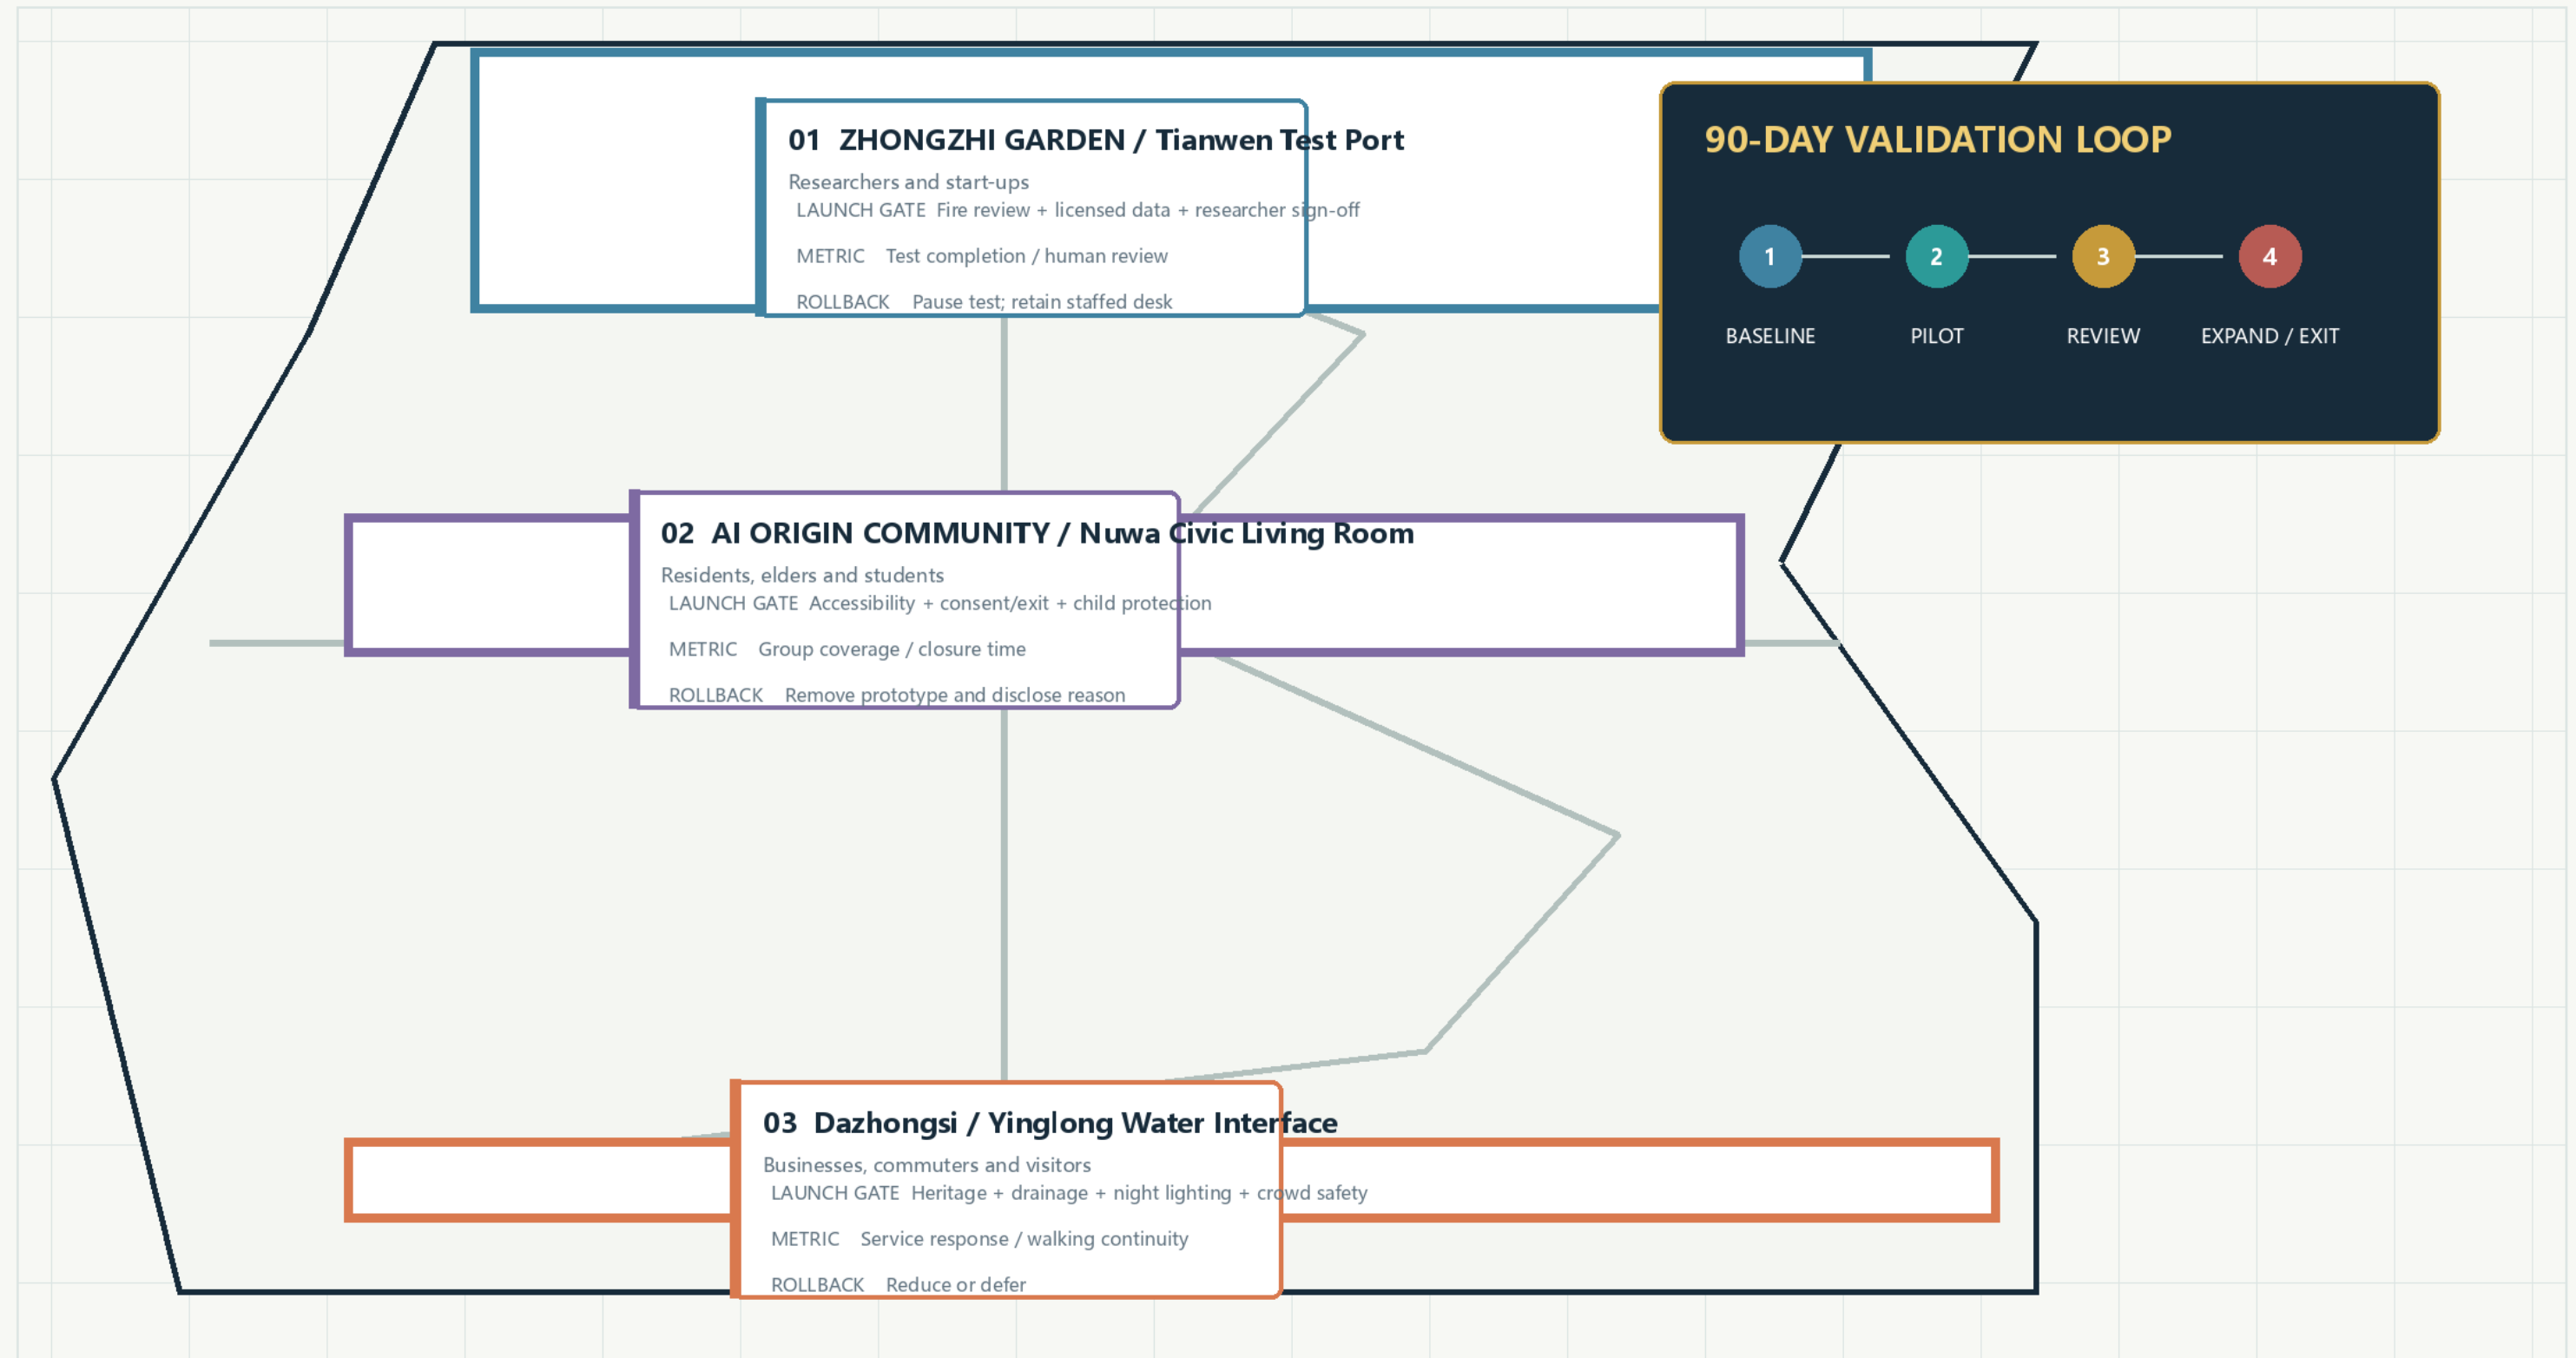

Colours express design intent, not statutory zoning. Green and public-space ratios are derived from metrics.json.

THREE KEY AREAS • FROM CONCEPT TO ACTION BRIEF

A3-03

Each area binds users, owner, launch gate, metric and rollback action; expand only after a 90-day review

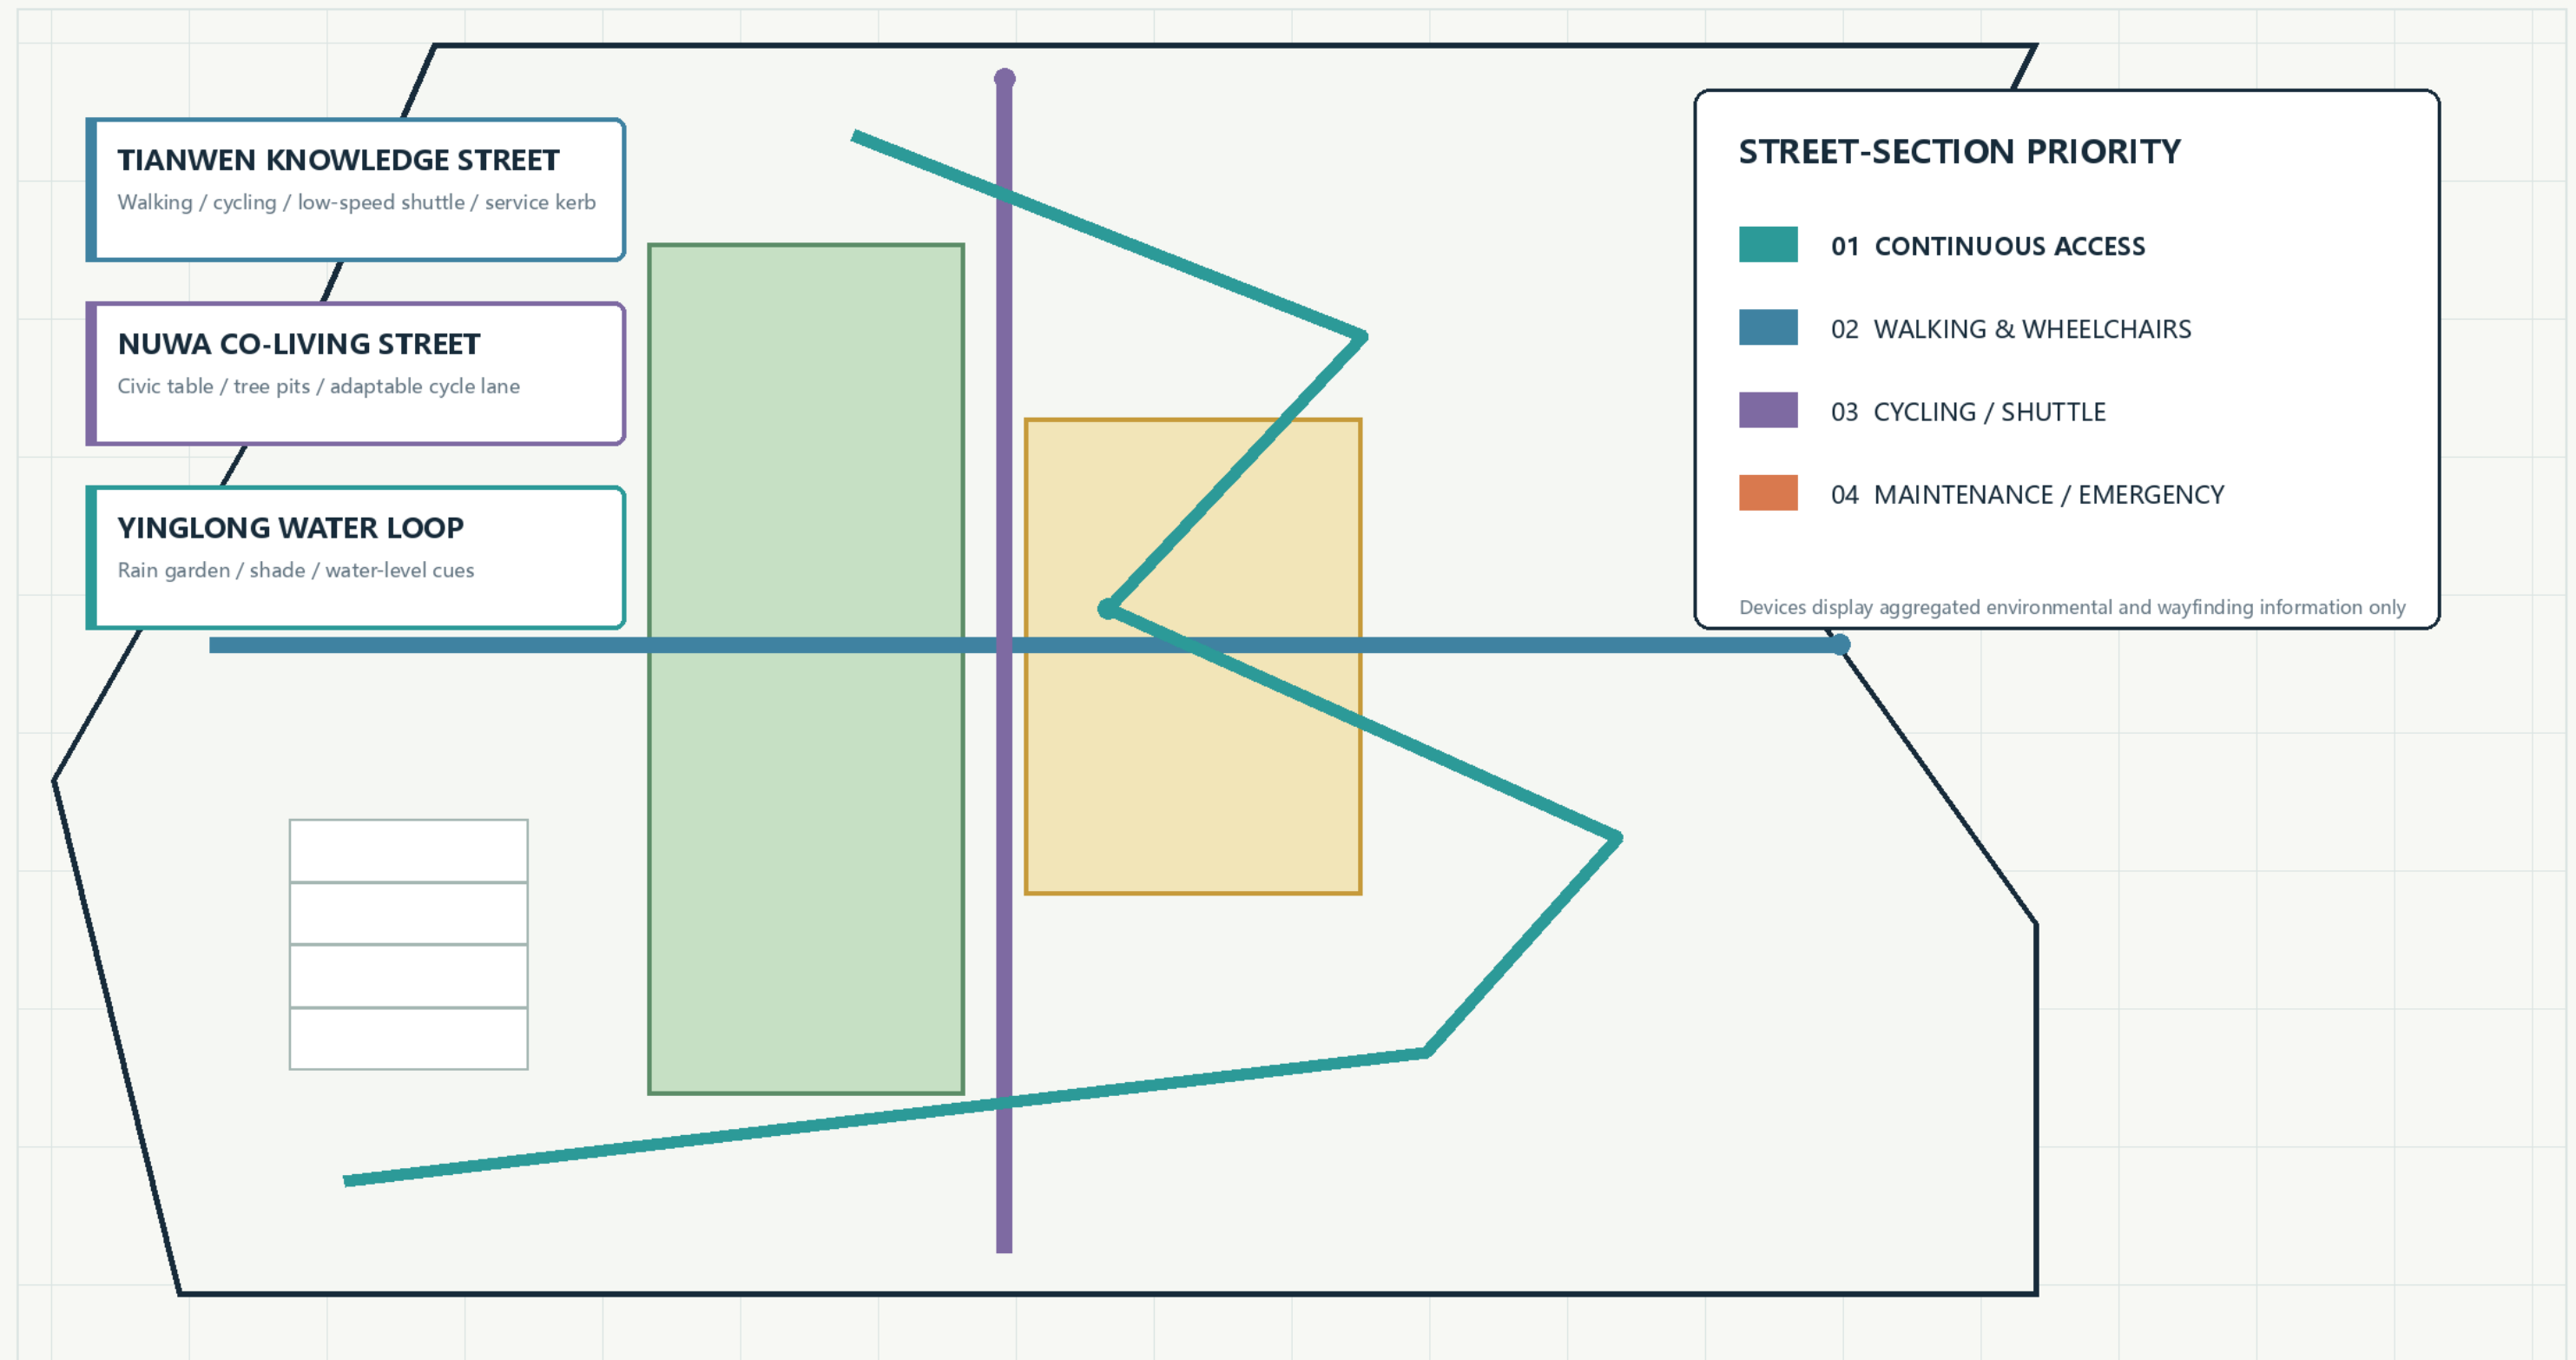

Key-area polygons remain provisional. Tasks and gates can be reviewed now; relocate them when verified geometry arrives.

CONCEPT / PROVISIONAL GEOMETRY

SLOW MOBILITY & BLUE-GREEN PUBLIC REALM

Walking first · flexible kerbs · continuous access · visible stormwater: Yinglong as maintainable public infrastructure

A3-04

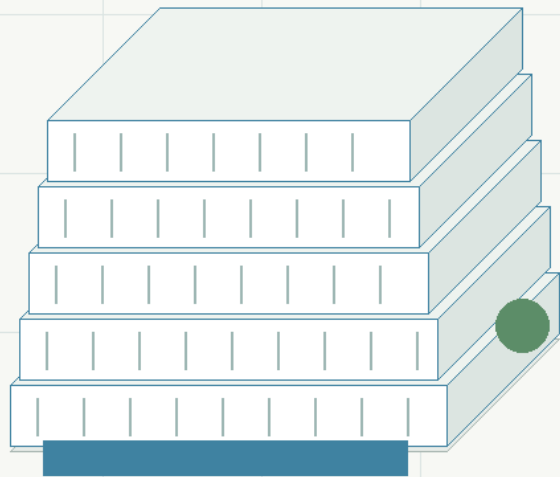

Blue-green and mobility systems are conceptual; drainage, transport, accessibility and maintenance teams must review before delivery.

CONCEPT / PROVISIONAL GEOMETRY

BUILDING PROTOTYPES & STREET INTERFACE

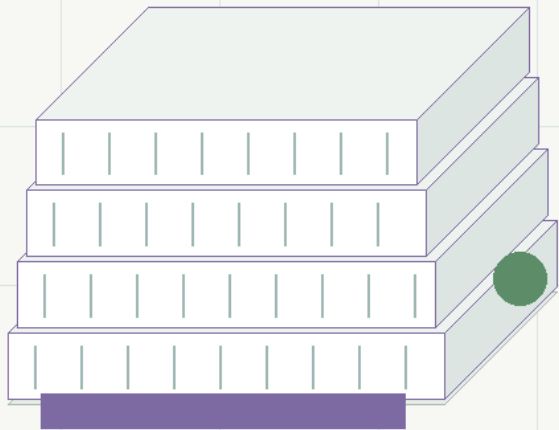

Discussable urban prototypes: civic ground floors, adaptable units, climate response and non-digital services

A3-05

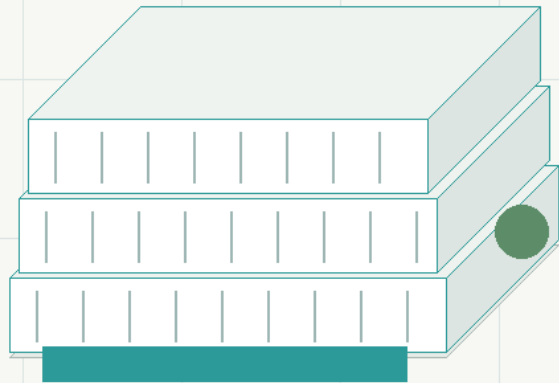

01 TIANWEN CLOUD TERRACE

R&D / model testing / civic gallery

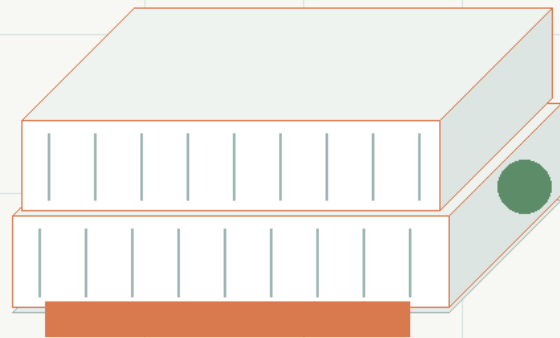

02 NUWA WEAVE COURT

Co-creation / repair workshop / shared court

03 YINGLONG WATER COURT

Open civic ground / rain court / deep eaves

04 STAR ATLAS INTERFACE

Accessible shuttle / public service / adaptable display

CONTINUOUS CIVIC GROUND FLOOR

INTERFACE PRINCIPLES

EVIDENCE CHAIN • DELIVERY RHYTHM • EXIT MECHANISM

A3-06

Turn long-term operation into annual, auditable outcomes: every urban AI service leaves explainable, participatory and exitable evidence

REPRODUCIBLE EVIDENCE CHAIN

- 01 GeoJSON**
Spatial relationships and geometry roles
- 02 metrics.json**
Areas, ratios and counts
- 03 proposal.md**
Design argument and limits
- 04 PNG / PDF / HTML**
Human-readable outputs
- 05 manifest.json**
Hashes and version record

ANNUAL OPERATION & EXIT

SPRING**QUESTION REGISTER**

Publish questions and partnership call

SUMMER**CONTROLLED PILOTS**

Three controlled pilots and review logs

AUTUMN**EXCHANGE & CORRECTION**

Multilingual demonstrations and cultural correction

WINTER**EVIDENCE & EXIT**

Cost, outcome and renew/exit decision

When verified GIS/CAD arrives: verify → overlay conflicts → relocate → recalculate → synchronize → sign off
